Study objectives

Assess the efficacy and tolerability of Keracnyl PP+ on acne-prone skin in adolescents and adults.

2 medical consultations
spaced 2 to 3 months apart

ALONE

IN ASSOCIATION

IN RELAY

KERACNYL PP+
ON ACNE-PRONE SKIN
IN ADOLESCENTS
AND ADULTS¹

EFFICACY

The mean
GEA* score
decreased by

-50%²

TOLERABILITY

Doctors judge
the tolerability
« very good »
or « good » for

99%²
of subjects

QUALITY OF LIFE

The mean CADI**
quality of life score
was significantly
improved by

67%²

*GEA: Global Evaluation of Acne ** CADI: Cardiff Acne Disability Index

1. Observational study no. DU-RV4133C-2022-01, 1 or 2 applications of the product per day after a face skin cleaned for 3 months, 1133 subjects

2. Evaluation for subjects with Keracnyl PP+ alone. Results obtained after 3 months of application
